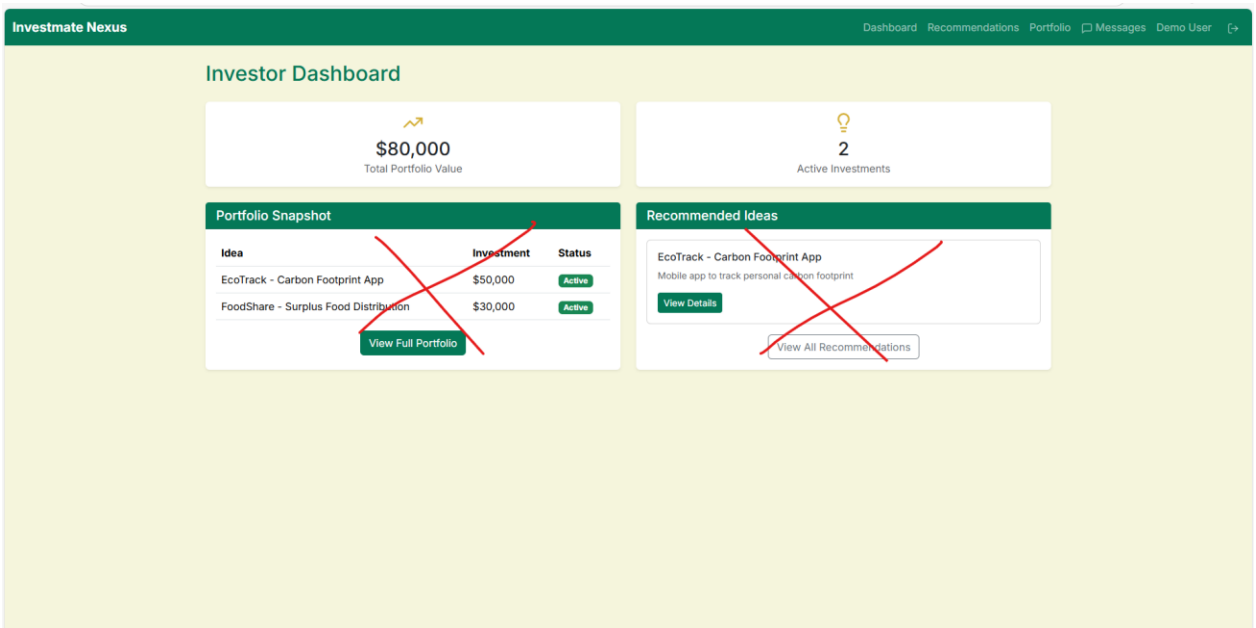
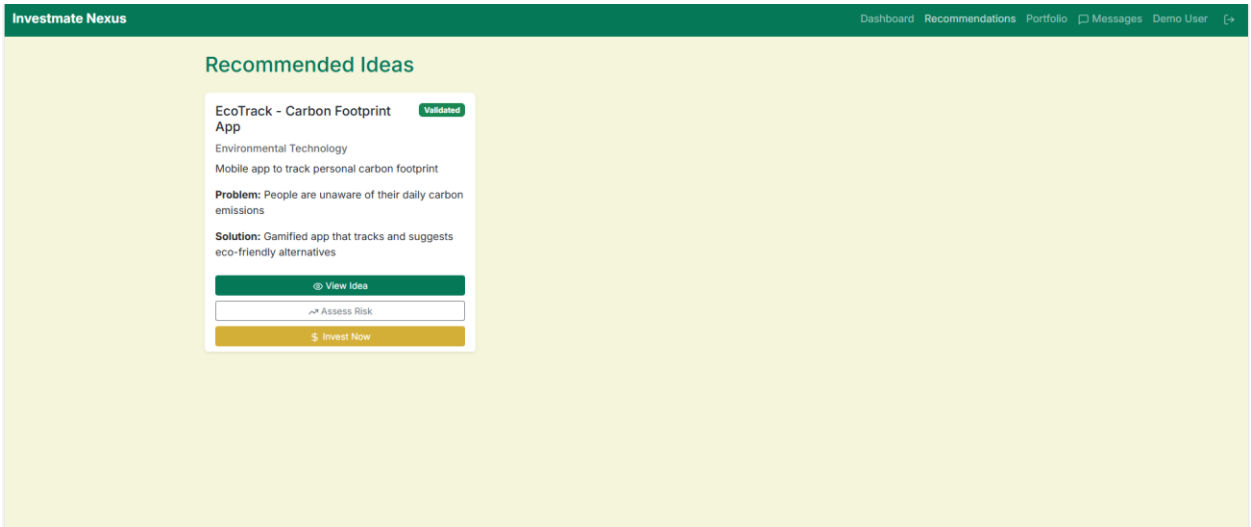
5	Receipts & Invoices Proof *	Bills showing use of investor funds	Image/PDF	Monthly	Tracking authenticity of expenses



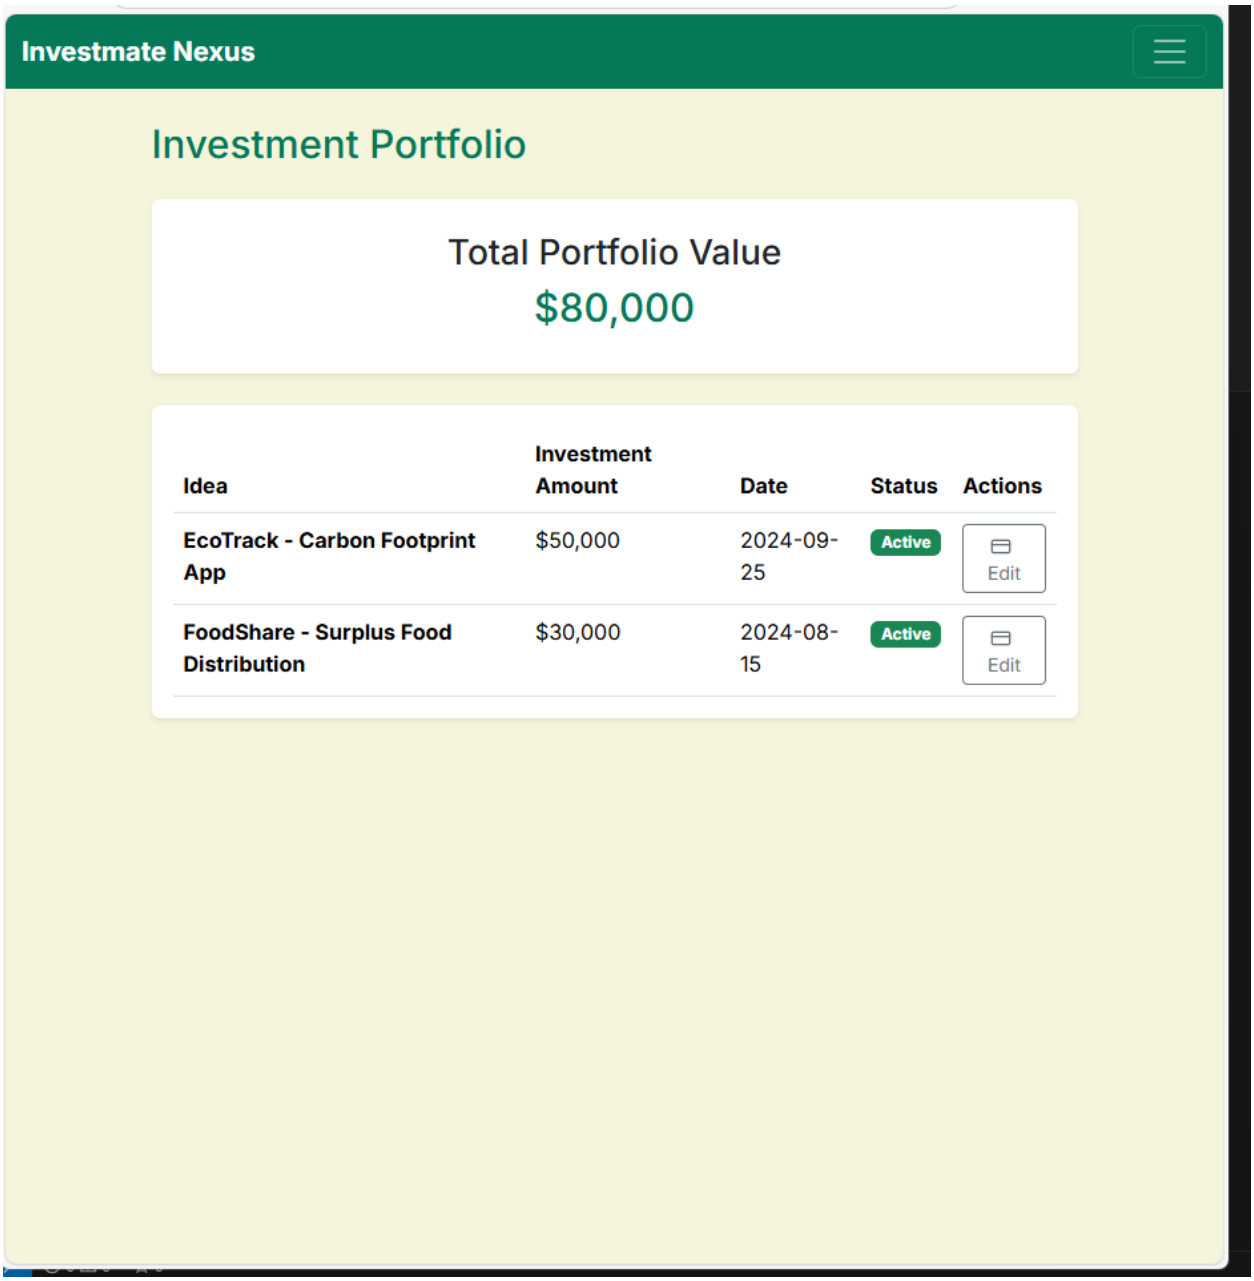
Investor dashboard page should show only total profit value + active investment card

And below there should be all the cards of all recommended business ideas added by entrepreneur

Cards should be like as in Recommendations page i-e



Investmate Nexus
Dashboard
Recommendations
Portfolio
Messages
Demo User
Recommended Ideas
EcoTrack - Carbon Footprint App
Validated
Environmental Technology
Mobile app to track personal carbon footprint
Problem: People are unaware of their daily carbon emissions
Solution: Gamified app that tracks and suggests eco-friendly alternatives
View Idea
Assess Risk
Invest Now



Portfolio page should only have invested buisnesses

(when a investor clicked on an invested business idea the following things will be shown on respective new page)

(under Action column Don't add edit add track investment button)

DOCUMENTS WE ARE USING

1. **Business Registration Document**
2. **Investment Utilization Report**

3. **Monthly Revenue Report**
4. **Cash Flow Statement**
5. **Receipts & Invoices Proof**

1. Business Registration Document → Trust & Verification

Entrepreneur uploads:

- Company registration certificate
- NTN, GST No., business license

Investor Uses It For:

Trust
Business authenticity
Verification before investing

System Shows:

- Preview document
- Verified/Not Verified badge
- "Uploaded on: DATE"

This document **does not affect ROI** — it only builds confidence.

2.Investment Utilization Report → Transparency + Spending Validation

Entrepreneur uploads:

- Breakdown of where the investor's money was used

Example categories:

- Marketing
- Equipment
- Salaries
- Raw Materials
- Operations

Investor Uses It For:

Check if entrepreneur is spending money correctly
Track exactly where her money went
Detect misuse of funds

System Extracts (entrepreneur enters):

```
marketing: 20,000
equipment: 10,000
salary: 8,000
operations: 5,000
other: 3,000
```

System Displays to Investor:

- A **pie chart** of investment usage
- A **table** showing spending categories
- Spending percentage & total spent from her investment

3.Monthly Revenue Report → Profit, Growth, and ROI Calculation

Entrepreneur uploads monthly:

- Revenue amount

System saves values like:

```
month: Jan
revenue: 500,000

month: Feb
revenue: 620,000
```

Investor Uses It For:

Track business growth
See if revenue is increasing
See how much profit is generated

System Calculates:

```
net_profit = revenue - expenses (from utilization + cash flow)
```

```
investor_profit = net_profit * investor_share
ROI = (investor_profit / invested_amount) × 100
```

System Displays:

- **Line chart** of revenue over months
- Total profit
- ROI %
- Month-wise revenue table
- "Revenue Growth +X%" badge

This is the **core document** for ROI.

---

4. Cash Flow Statement → Business Health & Stability

Cash flow = actual money movement
Entrepreneur uploads:

- Cash Inflows
- Cash Outflows

Your system stores:

```
cash_in: 300,000
cash_out: 220,000
net_cash = 80,000
```

Investor Uses It For:

Check if business has money
Detect negative months
Confirm business stability

System Displays:

- **Cash-flow line chart** (inflows vs outflows)
- Net cash per month
- Cash-flow health indicator:
  - Positive (Good)
  - Negative (Risky)

This helps investor judge if business can survive long-term.

5.Receipts & Invoices Proof → Authenticity of Spending

Entrepreneur uploads:

- Bills
- Receipts
- Payment screenshots

Example:

- Equipment receipt
- Facebook Ads bill
- Supplier invoice

Investor Uses It For:

Confirm authenticity of spending
Verify entrepreneur is telling truth
See how her money is actually used

System Shows:

- Image gallery of receipts
- Category tag (Marketing, Equipment, etc.)
- Upload date
- Amount (if tagged manually)

This increases **trust**.
